Skills

Languages (desc. by usage freq.):   C#, TypeScript, HTML, CSS, SQL, Python, Java, C++

Other skills: Git, MS DevOps, Atlassian Jira, MS Visual Studio, MS VSCode

Work Experience

Development Sub-Team Lead   June 2021-Present

402nd Software Engineering Group, 581 Software Maintenance Squadron, US Air Force

- Our current project has multiple parallel dev teams. As one of the sub-team leads, I help our PM do backlog refinement, size work items, and sequence things to avoid dependency in our sprints. I also coordinate all the work for our sub-team of ~5 developers and run the sprint planning meeting for our sub-team. (All this is on top of my normal software development responsibilities; I am still an active developer).

Web Applications Software Developer   March 2020-Present

402nd Software Engineering Group, 581 Software Maintenance Squadron, US Air Force

- Currently build full-stack web apps with Angular on the frontend and an ASP.NET microservice-driven API on the backend. Material UI, Kendo UI for Angular, and Jasmine Typescript unit tests.
- Built ASP.NET MVC Web Applications with Razor templating, jQuery (particularly the AJAX-related functionality), Telerik and Kendo UI for ASP.NET MVC, and Bootstrap 4.
- Both workloads: .Net Core, Entity Framework Core, Microsoft SQL Server, and XUnit C# unit tests. Also make heavy use of Git and Agile software development practices.

Education

University of Georgia, Athens, GA   June 2016-Dec. 2019

- Bachelor of Science, Computer Science
- Bachelor of Arts, Classical Languages: Greek
- Bachelor of Arts, Classics: Classical Culture
- Final overall college GPA: 4.0
- Summa cum laude, Honors Program, $3,000 Research Fellowship (one of 30 University-wide)
